

Phase 6: User Interface Development

This phase turned the SmartShop data model and automations into a clean, role-aware Lightning experience using Lightning App Builder, custom Home and Record pages, a Screen Flow action for fast line entry, and a Utility Bar for quick navigation.

6.1 SmartShop app theming and navigation

- The SmartShop Lightning app is branded and pinned to the nav bar with only relevant items: Products, Price Books, Orders, Accounts, Contacts, Reports, and Dashboards.
- Profile assignments ensure the app appears for Store Managers and Sales Representatives, keeping navigation consistent with security and roles.

6.2 Custom Home page (role-aware)

- A custom Home page is assigned to the SmartShop app with component visibility rules per profile.
- For Managers: key charts (Top Products, Orders by Month, Customers by Loyalty Tier) surface KPIs on load.
- For Sales Reps: Recent Items and a Tasks/Events panel speed up day-to-day work on Accounts, Contacts, and Orders.

6.3 Order record page (primary workspace)

- Template: full-width “Header and One Region” for maximum space on line-heavy orders.
- Tabs:
 - Details: Account, Status, Effective Date, Channel, Applied Voucher, Line_Net_Total__c.
 - Products & Billing: Order Products related list is the primary component for clear, fast line review.
- Quick Actions: “Add Products (Smart)” launches the Screen Flow in Draft; “Activate” appears once lines are present and validations pass.

The screenshot shows the 'Order' record page for Order 00000102. The header includes a search bar and navigation tabs: Home, SmartShop Dashboard Home, Accounts, Contacts, Products, Price Books, Orders (selected), Loyalty Transactions, Reports, Dashboards, Opportunities, Contracts, and Vouchers. Below the header, the order details are displayed: Account Name (GreenLeaf Store), Contract Number (00000102), Order Start Date (9/24/2025), Status (Activated), and Order Amount (INR 75,000.00). A progress bar indicates the order is 'Activated'. The main content area is divided into two sections: 'Related' and 'Details'. The 'Related' section contains two tables: 'Order Products (2)' and 'Order History (4)'. The 'Order Products' table lists two items: 'LED Desk Lamp' (Quantity: 5.00, Unit Price: INR 3,000.00) and 'iPhone 15 Pro' (Quantity: 1.00, Unit Price: INR 60,000.00). The 'Order History' table shows four entries: 'Order Activated' (9/25/2025, 11:04 PM, User: Anuj Kori, Original Value: Draft, New Value: Activated), 'Status' (9/25/2025, 11:04 PM, User: Anuj Kori, Original Value: Draft, New Value: Activated), 'Order Amount' (9/25/2025, 11:04 PM, User: Anuj Kori, Original Value: INR 0, New Value: INR 75,000), and 'Created' (9/24/2025, 7:38 AM, User: Anuj Kori, Original Value: INR 0, New Value: INR 75,000). The 'Details' section is currently empty.

6.4 Account record page (manager visibility)

- Highlights show Loyalty_Tier__c and Loyalty_Points__c at a glance.
- Related lists for Orders, Loyalty Transactions, and Benefit Vouchers enable a 360° customer view without page hops.

The screenshot shows the 'Account' record page for GreenLeaf Store. The header includes a search bar and navigation tabs: Home, SmartShop Dashboard Home, Accounts (selected), Contacts, Products, Price Books, Orders, Loyalty Transactions, Reports, Dashboards, Opportunities, Contracts, and Vouchers. Below the header, the account details are displayed: Type (GreenLeaf Store), Phone (987) 654-3215, Website, Account Owner (Anuj Kori), Account Site, and Industry. A progress bar indicates the account is 'Activated'. The main content area is divided into two sections: 'Related' and 'Details'. The 'Related' section contains four tables: 'We found no potential duplicates of this Account.', 'Contacts (2)', 'Opportunities (0)', and 'Cases (0)'. The 'Contacts' table lists two contacts: 'Anuj Kori' (Buyer, Email: anuj.salesrep@gmail.com, Phone: (987) 654-3215) and 'Arjun Rao' (Store Owner, Email: arjun@greenleaf.in, Phone: (987) 654-3215). The 'Details' section is currently empty. On the right side, there is an 'Activity' section with a 'Chatter' tab and a 'Filters' section. The 'Activity' section shows 'Upcoming & Overdue' activities, but no activities are currently displayed.

6.5 Product record page (inventory at a glance)

- Key fields are prominent: ProductCode, Category__c, Stock_Quantity__c, Low_Stock_Alert_Level__c.
- Price Book Entries related list lets users verify active pricing quickly.

The screenshot shows the 'Product record page' in SmartShop CRM. The page is titled 'Yoga Mat Pro' and displays various product details in a form layout. The top navigation bar includes 'SmartShop CRM' and a search bar. The main content area is divided into two columns. The left column contains fields for Product Name, Product Code, List Price, Product Currency, Stock Quantity, Product Category, Cost Price, Low Stock Alert Level, Created By, and Product Description. The right column contains fields for Active, Product Family, and Last Modified By. Below the form, there is a section titled 'Price Books (1)' with a table showing the 'Standard Price Book' with a list price of INR 500.00. The table has columns for Price Book Name, List Price, Use Standard Price, and Active. At the bottom, there are tabs for 'Left Column' and 'Right Column', and a 'Chatter Feed' button.

Price Book Name	List Price	Use Standard Price	Active
Standard Price Book	INR 500.00	☐	☒

6.6 Screen Flow for data entry (“Add Multiple Products”)

- Launched from the Order action “Add Products (Smart)” while Status = Draft.
- A single Screen (Repeater) captures multiple product + quantity rows, then inserts all OrderItems in one bulk operation.
- This reduces clicks, cuts entry time, and lowers errors compared to one-by-one line creation.

6.7 Utility Bar (always available)

- The SmartShop app includes a Utility Bar with Recent Items (and optional Notes later) to jump back to work from any page.
- This keeps context close at hand and reduces back-and-forth navigation for busy users.

6.8 List views, compact layouts, and dynamic forms

- List views for Orders (Draft, Activated) and Products (Low Stock) speed triage and daily monitoring.
- Compact layouts highlight the 3–5 most important fields for each object (e.g., Order: Status, Account, Total).
- Where appropriate, dynamic forms group fields into logical sections for clarity without custom code.

6.9 Acceptance criteria

- SmartShop app loads with correct tabs and Utility Bar for both Manager and Sales profiles.
- Manager Home shows charts on open; Sales Rep Home shows Recent Items and tasks.
- On an Order in Draft, “Add Products (Smart)” appears and creates multiple lines in one submit; “Activate” becomes available after lines are present and validations pass.
