

Phase 2 (SmartShop CRM)

Phase 2.1: Dev Org Setup

The SmartShop CRM build was initialized in a Salesforce Developer Edition org. This environment acted as an isolated sandbox for configuration, development, and testing, ensuring zero impact on any live or future production org.

Key Deliverables

1. Developer Org Configuration
 - A dedicated Salesforce Developer Edition org was provisioned as the primary development and testing environment.
 - All customizations, data loads, and validation activities were executed here before any promotion to higher environments.
2. Custom Lightning App: "SmartShop"
 - A SmartShop Lightning App was created to provide a focused and branded workspace for project stakeholders.
 - The app navigation was curated to include only the project-relevant objects and tools for faster access and fewer distractions:
 - Products
 - Price Books
 - Orders
 - Accounts
 - Contacts
 - Reports
 - Dashboards

Outcome

This initial setup established a stable structure for all downstream work (data model, pricing, security, automation, analytics) and ensured that each persona could navigate project components efficiently.

Phase 2.2: User Setup (Profiles & Roles)

A role- and profile-based access model was designed to balance data security with usability. Roles control data visibility up the management hierarchy, while profiles control permissions, object access, and UI elements.

Role Hierarchy

- Store Manager role placed above Sales Representative to reflect reporting lines.
- Managers inherit visibility into records owned by their team, enabling oversight, coaching, and reporting.
- Optional roles (as needed for future phases): Support, Integration, Analytics Security.

Profiles and Permissions

1. Store Manager Profile
 - Access to Reports and Dashboards for performance monitoring.
 - View/manage Products, Accounts/Contacts, and Orders across the assigned store scope.
 - Broader record visibility to supervise sales reps' work and support operational decisions.
2. Sales Representative Profile
 - Permissions focused on creating and managing Accounts/Contacts and Orders.
 - Limited access to advanced reporting to maintain a clean, task-focused UI.
 - Restricted cross-team visibility; data access aligns with individual responsibilities.

Phase 2.3: Company Profile & Operational Settings

Core organization settings were reviewed and set to ensure consistent, predictable behavior across the system for all users.

Company Profile Setup

- Company Information verified for organization name, address, and contact details.
- Default locale, language, and time zone configured to support consistent date/time/number formats across the org (e.g., English (India), Asia/Kolkata, INR).
- For this phase, defaults were retained where appropriate to focus on functional build-out.

Fiscal Year Settings

- Standard Fiscal Year was selected, beginning in January, to keep reporting and time-based grouping straightforward during initial rollout.
- Custom fiscal years were not required at this stage, as advanced financial reporting and accounting integrations were out of scope.

Business Hours & Holidays

- Not applied for Phase 2 since the current scope focuses on retail operations and sales; these settings are typically leveraged for case SLAs in Service Cloud.
- If service processes are added later, Business Hours can be set (e.g., Asia/Kolkata) and relevant holidays configured to support escalation rules.

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with options like Setup, Home, Object Manager, and Company Settings. The main content area is titled 'Company Information' and displays the organization's profile for 'SmartShopCRM'. The profile includes details such as Organization Name, Primary Contact, Division, Address, Phone, Fax, Default Locale, Default Language, Fiscal Year Starts In, Default Time Zone, Corporate Currency, Used Data Space, Used File Space, API Requests, Streaming API Events, Restricted Logins, Salesforce.com Organization ID, Organization Edition, and Instance.

Organization Detail	
Organization Name	SmartShopCRM
