

Phase 4: Process Automation (SmartShop CRM)

Phase 4: Process Automation (SmartShop)

This phase implements SmartShop's core business logic using Salesforce's declarative automation to enforce data quality, calculate totals and loyalty, and deliver a smooth rep experience. Where native price and order flows exist, they are reused to stay scalable.

Phase 4.1: Validation Rules

Purpose

Validation Rules block bad data at save time so pricing, stock, and loyalty stay accurate.

Rule A -Order_Date_Cannot_Be_Future

- Object: Order
- Goal: Order date should not be future date.
- Error Condition Formula:

text

EffectiveDate > TODAY()

- Error Message:

text

Order date should not be future date. Select past date

Rule C — Cost_Price_Should_Less_Than_List_Price

Object: Product2

Goal: Cost price should less than the List price.

Error Condition Formula:

text

```
AND(  
  NOT(ISBLANK(Cost_Price__c)),  
  NOT(ISBLANK(List_Price__c)),  
  Cost_Price__c >= List_Price__c  
)
```

- Error Message:

text

Cost price should less than the List price.

Rule D

Object: Product2

Goal: Stock_Cannot_Be_Negative

Error Condition Formula:

Stock_Quantity__c < 0

Error Message:

Stock Quantity should not be negative.

Phase 4.2:Workflow Rules

Workflow in Salesforce is an **automation tool** that allows you to perform **simple “if-then” actions** automatically when certain conditions are met

Low-stock alert (Product2)

- Trigger: Product2 after-save,
- When :
Stock_Quantity__c < Low_Stock_Alert_Level__c.
- Mechanism: Flow Action → Email Alert using a template (Product name, current stock).
- Recipients: Public Group “Store Managers” + optional Inventory/Purchasing queue
- Why: Proactive replenishment to avoid stockouts.

Workflow Rule

Low Stock Alert

Help for this Page

Go with the flow! With Flow Builder, the future of low-code automation, you can do everything you do with workflow rules — and more! Salesforce plans to retire workflow rules and recommends building automation in Flow Builder. [Tell Me More](#) | [Migrate your workflow rules to flows](#)

Workflow Actions

Edit

Immediate Workflow Actions

No workflow actions have been added.

Time-Dependent Workflow Actions

[See an example](#)

You cannot add time-dependent workflow actions because your evaluation criteria is "Every time a record is created or edited".

[Change Evaluation Criteria](#)

- Trigger: Record-triggered Flow on Order, after save, filtered on status change.
- When: **After Order status changes from Draft to Activated.**
- Mechanism: Flow creates Loyalty_Transaction__c
- Recipients: Customer email for receipt and a CRM/Marketing group for tracking.
- Why: Immediate posting builds trust, keeps the ledger/reporting in sync, and reduces support tickets.

Workflow Rule
Create Loyalty Transaction on Order

Go with the flow! With Flow Builder, the future of low-code automation, you can do everything you do with workflow rules — and more! Salesforce plans to retire workflow rules and recommends building automation in Flow Builder. [Tell Me More](#) | [Migrate your workflow rules to flows](#)

Workflow Rule Detail

Rule Name	Create Loyalty Transaction on Order	Object	Order
Active	☐	Evaluation Criteria	Evaluate the rule when a record is created, and any time it's edited to subsequently meet criteria
Description	Create loyalty transaction record when order is activated		
Rule Criteria	Order: Status EQUALS Activated		
Created By	Anil Kori, 9/23/2025, 3:52 AM	Modified By	Anil Kori, 9/23/2025, 3:52 AM

Workflow Actions

Immediate Workflow Actions

Type	Description
Task	Create Loyalty Transaction for Order (OrderNumber)

Time-Dependent Workflow Actions [See an example](#)

No workflow actions have been added. Before adding a workflow action, you must have at least one time trigger defined.

Phase 4.3 Email alerts

Email Alert is an **automated email notification** sent from Salesforce to specified recipients when certain conditions are met.
